🗄 Work Experience

Senior Associate Technology L2   2018 – present
Publicis Sapient, Gurgaon

Frictionless Shopping
Working as a Frontend lead for a leading FMCG client. The project involves detecting Products on brand's webpages using Machine Learning crawling and then showing Svelte's based web components based on the ML's API response. The App displays various components like Shop the story on the page and then takes the user to buying journey.

Brand Site development
Developed multiple components and campaign journeys for leading FMCG sites like Dove, Axe, Tresemme etc which are being used throughout the sites and campaign pages. Also performed performance optimization for the sites.

Mentor Mentee App (Hackathon)
Developed MERN stack app for managing mentors and mentee communication. The App had lots of features and also won Runner's up award in Sapient.

Other Initiatives
Developed Hire buddy internal application, 2 times speaker in XT townhall, spoke in XT Summit 2019 and contributed to multiple frontend community initiatives.

Technologies used: Svelte, Web-components, Javascript, AWS, Devops, React, Node.js and MongoDB.

Senior Frontend Developer   2017 – 2018
Collegedunia.com, New Delhi

Progressive Web App (PWA)
Developed Multiple Web pages for new progressive web app which resulted in faster page loads and increase in total visits. Also developed Revicon (India's no. 1 college review competition) and Study Abroad Module for the site. Added Material design to the existing page and developed a chrome extension for the organization.

Technologies used: Javascript, PWA, Manifest, Service-workers, PHP, HTML, SASS.

Senior Systems Engineer   2014 – 2017
Infosys Ltd, Chandigarh

Web development for multiple clients (Diageo, AON, Horizon Blue cross)
Involved in developing responsive website for a leading beverage company. I also participated in requirement elicitation, analysis and Estimation of Project Timeline. I also delivered UI Training for people within Infosys.

Technologies used: Kendo-UI, Javascript, Jquery, React.js, PHP, Laravel, CSS and HTML.
